PROFESSIONAL EXPERIENCE

Pip Empire Cryptocurrency Fintech Company, *Frontend Developer*   Dec 2023 - Present | Toronto - Remote

Developed various well-documented reusable React applications and performant components, and worked closely with product owners, designers, and backend developers as part of a cross-functional team.

- Improved user experience by creating reusable React.js components in collaboration with the UI/UX team.
- Actively participated in code reviews, providing and receiving feedback to improve the code base and share knowledge in an agile environment.
- Collaborated in the frontend project using GitLab CI/CD, ensuring seamless integration, efficient builds, and reliable deployment processes.
- Conducted comprehensive technology review, creating concise pros and cons documents to aid development team in decision-making.

GoodBot NGO, *Frontend Developer (Volunteer)*   Feb 2024 - Present | Vancouver - Remote

- Developed and implemented responsive web applications for the "Responsible Tech Project" ensuring seamless user experience across various devices and screen sizes using React.js and Tailwind.
- Contributed to API design and documentation utilizing Swagger.

ESG Studio, *Frontend Developer*   May 2022 – Aug 2023 | Vancouver - Remote

- Maintained modern and legacy projects, using ActionScript and C# to ensure smooth and efficient run.
- Troubleshot and debugged front-end issues including missing animations, audio reset bugs, and image overlaps.
- Developed the project user interface based on the prototypes provided by the UX team, and used Jenkins CI/CD.
- Safely integrated new technologies, updated dependencies, and replaced SDKs and third-party libraries.

EDUCATION

Associate Certificate in Applied Web Development – BCIT   Sep 2019 – Jun 2022
